Topic of Discussion : Data Analytics Training

Lecture Summary:

The discussion is started with the students of MBA and MCA with the question that after the completion of MCA and MBA where actually the students wanted to go. Students answered it with the various answers like big data analysis, software development, financial analysis etc. Then the lead trainer Dr. Ravi guided them with the various upcoming technologies that are present in today's market these are SAS, SAP, Digital marketing, IMD data, Big data Hadoop, web designing, testing, DBA ,PLSQL,JAVA,PHP,.NET etc.

Also, he introduced his institute which provides the training of all these courses to any graduate and post graduate students with the placement assistance. The session has been ended with intellectual questions and answers.
